

ORGANIZATIONS FACILITATING BUSINESS

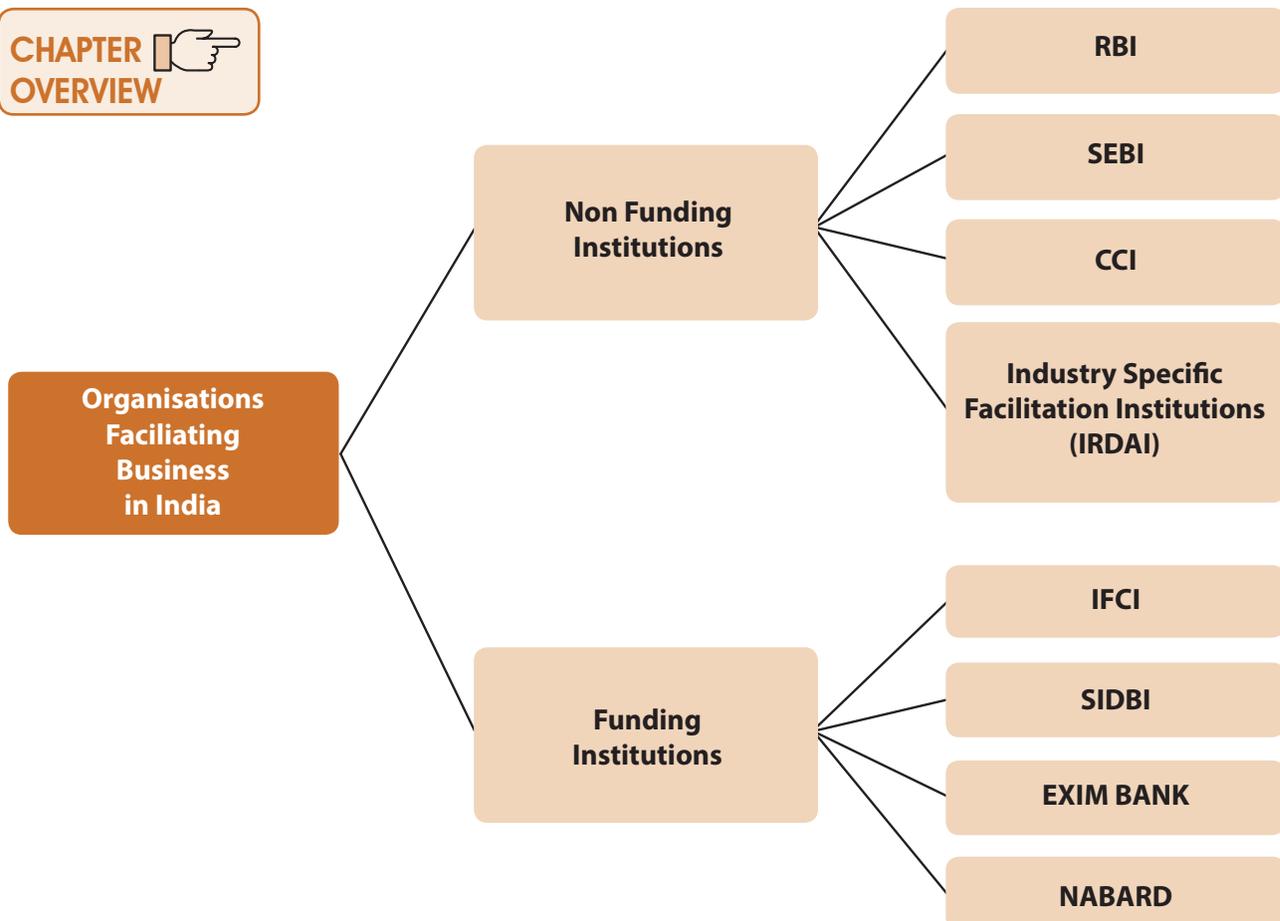

LEARNING OUTCOMES

After studying this chapter, you will be able to:

- ◆ Describe the meaning of business facilitation.
- ◆ Explain the need for organizational / institutional arrangements for stimulating, supporting and sustaining business.
- ◆ Differentiate between funding and non-funding organisations.
- ◆ Describe briefly the purpose, functions and schemes of some of the facilitating organizations.

CHAPTER OVERVIEW

5.1 INTRODUCTION

In the first chapter of the study material, we had introduced **business facilitators as a system of arrangements that ease the doing of business**. Drawing an analogy, can you recall that in our primary classes we read about **our helpers?** The way they simplify our lives and make us comfortable, business facilitators do the same for the businesses. We rationalised their need in the context of complexities associated with pursuing business as an occupation / career vis-à-vis a well-defined employment and not so complex professional practice. One may argue that since auxiliaries or aids to trade such as banking, insurance, transport, warehousing etc. too ease the doing of business, these should also be referred to as organizations facilitating business. Yes, these are. All the auxiliaries to trade comprise an important layer of business facilitators. Let's us situate these at the intermediate layer. In the layer above one would like to place such policy making and executive agencies as the Reserve Bank of India (RBI), the Securities and Exchange Board of India (SEBI), Competition Commission of India (CCI) and such regulatory cum developmental agencies such as Insurance Regulatory and Development Authority (IRDA). One may also envisage a layer of facilitators below that we may refer to as the Point of Contact Layer. Together, these may be regarded as comprising what may be defined as Business Facilitation System (Figure #1).

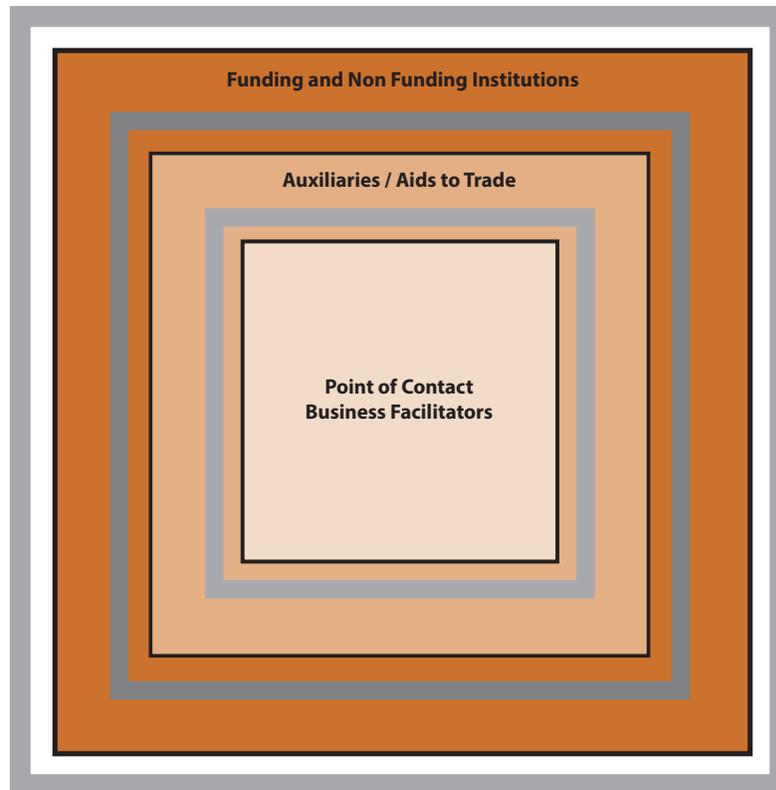

Figure-1: Business Facilitation System

Point of Contact (POC) Business facilitators help the business in several ways. Consider the following (illustrative list only):

- a **freight forwarder** i.e. a person or company who organizes shipments for the business firms to get goods from the manufacturer or producer to a market, customer or final point of distribution. Note freight forwarders network with shipping Companies/ Airlines, Railways & Roadways and origination, transit and destination ports and warehouses [all auxiliaries / aids to trade] to provide logistics support to the business;

- a **business incubator** helps create and grow young businesses by providing them with necessary support and financial and technical services; and a **business accelerator** helps a budding business quickly launch a product and put it in the fast lane of commercial success;
- a **financial consultant** who advises the business on the various sources of finance- domestic as well as foreign; debt as well as equity; short-term as well as long-term and helps it mobilise its requirements too. It may be noted that merchant bankers/ financial consultants are not themselves the financing institutions- the auxiliaries or aids to trade;
- a **merchandiser** who helps the business e.g. a fashion house obtains its supplies- fabrics, accessories, etc.

The term business facilitator is formally defined in the financial sector as intermediaries performing a host of functions linking the banks / financial institutions and their potential clients (Concept Elaboration #1).

Concept Elaboration #1: Business Facilitators in Financial Sector

Business Facilitators are intermediaries such as, NGOs/ Farmers' Clubs, cooperatives, community based organisations, IT enabled rural outlets of corporate entities, Village Knowledge Centres, Agri Clinics/ Agri Business Centers, Krishi Vigyan Kendras and individuals like insurance agents, retired bank employees/teachers etc for providing facilitation services. Such services may include (i) identification of borrowers (ii) collection and preliminary processing of loan applications including verification of primary information/data; (iii) creating awareness about products, provide advice on managing money and debt counselling; (iv) processing and submission of applications to NABARD Financial Services Limited (NABFINS) (v) promotion and nurturing Self Help Groups/ Joint Liability Groups/ Producers' groups ; (vi) post-sanction monitoring; (vii) monitoring and handholding of Self Help Groups/ Joint Liability Groups/ Credit Groups/ Producers' groups etc.; and (viii) follow-up for recovery. However, they shall not engage in cash handling including disbursements, collections etc.

Business facilitators may be distinguished from business correspondents who may be defined as 'banks in person.' These individuals and entities actually provide banking and financial services. Obviously, for this reason business correspondents are more closely regulated than business facilitators who do not engage in the banking and finance business in the sense of handling deposits, repayments etc.

5.1.1 Government as a Business Facilitator

In the preceding chapter, we have seen how the government policy is a powerful and pervasive determinant of business activity. There is barely any sphere of business and commerce that is not affected by government policy.

India's freedom fighters did not merely fight for political independence of India. They had a long term vision of India's economic development. The Union Government came up with the Industrial Policy statement in 1948, barely a few months after independence. In 1951, the Union Government enacted the Industries Development & Regulation Act. The IDRAI entrusted the government with the responsibility of ushering in economic development via industrialisation in India. The Industrial Policy Resolution of 1956 providing for the respective roles of the Public Sector, Large Industries and Small Scale Industries guided the growth of business in India for more than three decades. Initially, the public sector enterprises were to command the industrial development of India. Role of private sector was limited to the production of consumer goods. However, as the economy got stronger with time and the other wherewithal of facilitation of private

businesses e.g. initially the development banks, the industrial estates and later a developed capital market etc. took shape, the private sector has grown from strength to strength. In this context, **the New Economic Policy of 1991 which is better known as the LPG or GPL policy i.e. the policy of liberalisation, privatisation and globalisation is regarded as the watershed development in business facilitation in India.**

The government facilitates business not only via formulating business friendly policies but also by creating an institutional apparatus for the implementation of those policies. In the preceding chapter you have learnt about the policies; in this chapter our focus is on institutions.

5.2. NON-FUNDING INSTITUTIONS FOR BUSINESS FACILITATION IN INDIA (INDIAN REGULATORY BODIES)

The institutions such as the Reserve Bank of India which is the central bank of the country, the Securities and Exchange Board of India which is the apex body of securities exchanges and the Competition Commission of India which is the rule setter for fair play in business provide the supra context of business facilitation. Then there are **industry specific business facilitators** too such as the Insurance Regulatory and Development Authority, Telecom Regulatory Authority of India and the like. These institutions do not invest in businesses and as such are called non funding institutions. In addition to a broad, general description of their roles and functions, our emphasis here would be on their respective roles as business facilitators. Here it would be pertinent to mention that there are several other non funding institutions that facilitate businesses right from pre-formation to product and process testing, training of manpower and a host of business extension services. For example, the National Institute of Entrepreneurship and Small Business Development (NIESBUD) focuses on training the trainers in entrepreneurship development; Entrepreneurship Development Institute (EDI) is the national level apex organisation for entrepreneurship development. Then there are 30 Micro, Small and Medium Enterprises Development Institutes and 28 Branch MSME-DIs (formerly SISIs) set up in State capitals and other industrial cities all over the country for providing a host of services to the entrepreneurs / small businesses. These institutes render consultancy services, prepare state industrial profiles and conduct district level industrial potential surveys. Besides, these institutes prepare project profiles and facilitate quality control and upgradation in these enterprises.

There are several commodity boards and export promotion councils that assist businesses in their international forays. Institutes like India Trade Promotion Organisation and India Brand Equity Foundation aim to enhance India's image as a sourcing partner and investment destination. We should not forget the facilitative role of government's such schemes as Make in India and Startup India for furthering and facilitating Indian businesses.

5.2.1 Reserve Bank of India (RBI)

I. Introduction

The Reserve Bank of India (RBI) was established on April 1, 1935 in accordance with the provisions of the Reserve Bank of India Act, 1934. Though originally privately owned, since nationalisation in 1949, the Reserve Bank is fully owned by the Government of India. The Central Office of the Reserve Bank was initially established in Calcutta but was permanently moved to Mumbai in 1937. The Reserve Bank's affairs are governed by a central board of directors. The board is appointed by the Government of India in keeping with the RBI Act.

II. Role of RBI

The Reserve Bank of India is the Central Bank of our country. It occupies a pivotal position in the Indian economy. Its role is summarised in the following points:

- The RBI is the apex monetary institution of the highest authority in India. Consequently, it plays an important role in strengthening, developing and diversifying the country's economic and financial structure.
- It is responsible for the maintenance of economic stability and assisting the growth of the economy.
- It is India's eminent public financial institution given the responsibility for controlling the country's monetary policy.
- It acts as an advisor to the government in its economic and financial policies, and it also represents the country in the international economic forums.
- It also acts as a friend, philosopher and guide to commercial banks. In fact, it is responsible for the development of an adequate and sound banking system in the country and for the growth of organised money and capital markets.
- India being an emerging economy, the RBI has to keep inflationary trends under control and to see that main priority sectors like agriculture, exports and small scale industry get credit at cheap rates.
- It has also to protect the market for government securities and channelise credit in desired directions.

III. Functions of RBI

The Preamble of the Reserve Bank of India describes its basic functions as:

"...to regulate the issue of Bank Notes and keeping of reserves with a view to securing monetary stability in India and generally to operate the currency and credit system of the country to its advantage."

The Reserve Bank of India, being the Central Bank of India performs all the central banking functions. These are:

- Issue of currency:** The RBI is the sole authority for the issue of currency in India other than one rupee coins and notes and subsidiary coins, the magnitude of which is relatively small.
- Banker to the government:** As a banker to the government, the RBI performs the following functions:
 - (a) It transacts all the general banking business of the Central and State Governments. It accepts money on account of these governments and makes payment on their behalf and carries out other banking operations such as their exchange and remittances.
 - (b) It manages public debt and is responsible for issue of new loans. For ensuring the successes of the loan operations, it actively operates in the gilt-edged market and advises the government on the quantum, timing and terms of new loans.
 - (c) It also sells Treasury Bills on behalf of the Central Government in order to wipe away excess liquidity in the economy.
 - (d) The RBI also makes advances to the Central and State Governments which are repayable within 90 days from the date of advance.

(e) The RBI also acts as an adviser to the government not only on policies concerning banking and financial matters but also on a wider range of economic issues including those in the field of planning and resource mobilisation. It has a special responsibility in respect of financial policies and measures concerning new loans, agricultural finance and legislation affecting banking and credit and international finance.

(iii) Banker's Bank: The RBI has been vested with extensive power to control and supervise commercial banking system under the Reserve Bank of India Act, 1934 and the Banking Regulation Act, 1949. All the scheduled banks are required to maintain a certain minimum cash reserve ratio with the RBI against their demand and time liabilities. This provision enables the RBI to control the credit position of the country.

The RBI provides financial assistance to scheduled banks and state cooperative banks in the form of discounting of eligible bills and loans and advances against approved securities.

The RBI also conducts inspection of the commercial banks and calls for returns and other necessary information from banks.

(iv) Custodian of Foreign Exchange Reserves : The RBI is required to maintain the external value of the rupee. For this purpose it functions as the custodian of nation's foreign exchange reserves. It has to ensure that normal short-term fluctuations in trade do not affect the exchange rate. When foreign exchange reserves are inadequate for meeting balance of payments problem, it borrows from the IMF.

The RBI has the authority to enter into exchange transactions on its own account and on account of government. It also administers exchange control of the country and enforces the provisions of Foreign Exchange Management Act.

(v) Controller of Credit : Credit plays an important role in the settlement of business transactions and affects the purchasing power of people. The social and economic consequences of changes in the purchasing power are serious, therefore, it is necessary to control credit. Controlling credit operations of banks is generally considered to be the principal function of a central bank. The RBI, like any other Central Bank, possesses power to use almost all qualitative and quantitative methods of credit controls.

(vi) Promotional Functions: Apart from the traditional functions of a Central Bank, the RBI also performs a variety of developmental and promotional functions. It is responsible for promoting banking habits among people and mobilising savings from every corner of the country. It has also taken up the responsibility of extending the banking system territorially and functionally. Initially, it had also taken up the responsibility for the provision of finance for agriculture, trade and small industries. But now these functions have been handed over to NABARD, EXIM Bank and SIDBI respectively. The Reserve Bank is responsible for over all credit and monetary policy of the economy.

(vii) Collection and publication of Data: It has also been entrusted with the task of collection and compilation of statistical information relating to banking and other financial sectors of the economy.

IV. RBI's Role in Business Facilitation

- **Currency Policy:** The RBI is responsible for the monetisation of the economy (and in the recent context of demonetisation or remonetisation too). Adequate money supply is critical for the functioning of the economy. All the factor incomes in a modern economy are in fact money incomes. Business's revenue too is monetised. Moreover, the RBI also oversees the viability of foreign currency to facilitate overseas

business transactions. It plays an important, albeit an indirect role in the determination of exchange rates i.e. the rates at which the domestic currency is exchanged with foreign currencies and vice versa.

- **Credit Policy:** The RBI does not fund the business or for that matter any activity. However, its policies have a major impact on channelisation of the banking resources for business, generally as well as specifically for certain sectors. A small reduction in the Statutory Liquidity Ratio (SLR), Cash Reserve Ratio (CRR) or Bank Rate can put huge funds at the disposal of the commercial banks for lending to the business and other sectors. Let us introduce ourselves to the measure of magnitude of financial parameters such as interest rates. **It is called basis points.** One per cent is equivalent to 100 basis points. To illustrate if current bank rate is 7.75% and RBI decreases it by 25 basis point, then new rate will be 7.50% as 25 basis point will be equal to 0.25%)

SLR and CRR are **quantitative measures of credit policy**; these **affect funds availability to all the sectors**. RBI has in its armour **qualitative measures of credit control** too through which it **influences the credit availability to a particular sector**. As an instance in sector specific impact of the RBI's credit policy, let us consider the provision of Priority Sector Lending (PSL). Every bank is required to comply with this requirement by lending a specified percentage of its resources to the industries/ activities included in PSL. For example, loans to Micro, Small and Medium Enterprises (MSME) qualify as PSL. This policy of the RBI has tremendously benefited the MSME Sector in India.

An inevitable part of the credit policy is the interest rate. Reserve Bank of India influences the interest rates through such policy instruments as **bank rate**. Since RBI provides loans to the banks either by direct lending or by rediscounting (buying back) the bills of commercial banks and treasury bills, it is also known as **discount rate**. Bank rate is the rate of interest at which the RBI lends to banks, It reflects the cost of funds to the banks who in turn adjust their lending rates accordingly. To illustrate, higher bank rate will translate to higher lending rates by the banks. The concept of bank rate is often compared with repo rate and reverse repo rate (See Concept Elaboration #2).

Concept Elaboration #2: Bank Rate Related Concepts

Repo Rate. The rate at which banks borrow money from the RBI against pledging or sale of government securities to RBI is known as "Repo Rate." Repo rate is a short form of Repurchase Rate. Generally, these loans are for short durations up to 2 weeks. **Repo Rate differs from Bank Rate with respect to the time horizon.** Repo Rate is a short-term measure and it refers to short-term loans. On the other hand, Bank Rate is a longterm measure and is governed by the long-term monetary policies of the RBI.

Reverse Repo Rate. It is the rate of interest offered by RBI, when banks deposit their surplus funds with the RBI for short periods.

- **Development of the Financial System:** Finance is said to be the life blood of business. And a well developed financial system is regarded as the *sine qua non* (an absolute imperative) for economic development. The financial system typically comprises financial institutions, financial instruments and financial markets. RBI may be regarded as the heart of the financial system. It oversees the functioning and outreach of the commercial banks as well as non banking finance companies. The funds that RBI usurps via stipulating SLR and CRR are channelised to development finance institutions, called Development Banks in India. We shall be elaborating this in the section on development banks in this chapter.

- **Funds Transfer and Payments Mechanism:** Making and receiving payments is an integral part of any economic transaction. In a modern economy one may envisage paper based and digital payments and funds transfer mechanisms. Paper based mechanisms would include for example currency, cheques and bills of exchange. Digital payments would include Card Swiping, Internet Banking and so on. Reserve bank of India presides over the system and sets the rules of the game. Can we imagine a thriving business sector without an efficient payments and funds transfer system?

5.2.2 Securities and Exchange Board of India (SEBI)

I. Introduction

The Securities and Exchange Board of India (SEBI) was established by the Government of India on 12th April 1988 and given statutory powers in 1992 with SEBI Act, 1992 being passed in the Parliament. The SEBI Act, 1992 has come into force with effect from **30th January, 1992**.

SEBI is an authority to regulate and develop the Indian capital market and protect the interest of investors in the capital market. Controller of Capital Issues has been repealed by the SEBI, an authority under Capital Issue (Control) Act, 1947.

SEBI has its headquarters at the business district of Bandra Kurla Complex in Mumbai, and has Northern, Eastern, Southern and Western Regional Offices in New Delhi, Kolkata, Chennai and Ahmedabad, respectively.

Controller of Capital Issues (CCI) was the regulatory authority before SEBI came into existence; it derived authority from the Capital Issues (Control) Act, 1947. In April 1988, the SEBI was constituted as the regulator of capital markets in India under a resolution of the Government of India.

The SEBI is managed by a board, which consists of following:

- A Chairman, who shall be appointed by Central Government and he shall be a person of ability, integrity and standing in the field of securities market, law, finance, accountancy, economics, administration, etc.
- Two members from amongst the officials of the Ministry of the Central Government dealing with Finance and administration of the Companies Act, 2013, who shall be nominated by the Central Government.
- One member from amongst the official of RBI, who shall be nominated by RBI.
- Five other members out of which atleast three members shall be whole-time members, who shall be appointed by Central Government and they shall be persons of ability, integrity and standing in the field of securities market, law, finance, accountancy, economics, administration, etc.

II. Functions and Responsibilities of SEBI

The Preamble of the Securities and Exchange Board of India describes the basic functions of the Securities and Exchange Board of India as **“...to protect the interests of investors in securities and to promote the development of, and to regulate the securities market and for matters connected there with or incidental there to”**.

SEBI has to be responsive to the needs of three groups, which constitute the market:

- the issuers of securities
- the investors
- the market intermediaries.

SEBI has three functions rolled into one body which are as follows:

- **Quasi-legislative:** SEBI drafts regulations in its legislative capacity.
- **Quasi-judicial:** SEBI passes rulings and orders in its judicial capacity.
- **Quasi-executive:** SEBI conducts investigation and enforcement action in its executive function.

Though this makes it very powerful, there is an appeal process to create accountability. There is a Securities Appellate Tribunal which is a three-member tribunal and is headed by Mr. Justice J P Devadhar, a former judge of the Bombay High Court. A second appeal lies directly to the Supreme Court. SEBI has taken a very proactive role in streamlining disclosure requirements to international standards.

III. Powers of SEBI

For the discharge of its functions efficiently, SEBI has been vested with the following powers:

1. To approve by-laws of stock exchanges.
2. To require the stock exchange to amend their by-laws.
3. To inspect the books of accounts and call for periodical returns from recognized stock exchanges.
4. To inspect the books of accounts of a financial intermediary.
5. To compel certain companies to list their shares in one or more stock exchanges.

IV. SEBI's Role in Business Facilitation

SEBI is responsible for the development of India's capital market i.e. market for the corporate issues of capital. For example, it facilitates public offering of capital by the company. Thus, these companies are able to access the capital market for their funding requirements. It also oversees the subsequent trading of their shares on the floor of the stock exchanges. It even facilitates overseas entities desirous of participating in Indian capital markets and the domestic capital market entities desirous of participation in overseas markets. It coordinates with the market developers and regulators abroad. It is responsible for investors' faith in the functioning of the capital markets and thus assures the corporates of steady flow of funds.

5.2.3 Competition Commission of India (CCI)

I. Introduction

Competition is a contest between organisms, animals, individuals, groups, etc. in the context of business, competition is the best means of ensuring that the 'Common Man' has access to the broadest range of goods and services at the most competitive prices. With increased competition, producers will have maximum incentive to innovate and specialize. This would result in reduced costs and wider choice to consumers. A fair competition in market is essential to achieve this objective. Competition Commission was set up to create and sustain fair competition in the economy that will provide a 'level playing field' to the producers and make the markets work for the welfare of the consumers.

Competition may be either Direct or Indirect as discussed below:

- i. Direct competition:** Products that perform the same function compete against each other. Example: Fast-food restaurants McDonald's and Burger King, Coca-Cola and Pepsi, Pizza Hut and Dominos etc have competition with each other.
- ii. Indirect competition:** Products that are close substitutes for one another compete.

Example: A fine dining restaurant has competition with other local restaurants, but it also competes with nearby supermarkets that offer ready-to-eat meals such as frozen parathas and eat and serve dishes.

There should be free and fair competition in the market to get the following benefits:

- a. Encourages Innovation.
- b. Increases Efficiency.
- c. Punishes the Laggards.

- d. Boosts choice improves quality, reduces costs.
- e. Ensures availability of goods in abundance of acceptable quality in affordable price.

II. The Competition Act, 2002

Basically, Competition law is a tool to implement and enforce competition policy and to prevent and punish anti-competitive business practices by firms and unnecessary Government interference in the market. The Competition Act, 2002, as amended by the Competition (Amendment) Act, 2007, follows the philosophy of modern competition laws. The Act prohibits anti-competitive agreements, abuse of dominant position by enterprises and regulates combinations (acquisition, acquiring of control and M&A), which causes or likely to cause an appreciable adverse effect on competition within India.

III. Features of the Competition Act, 2002

- i. The competition Act, 2002 has been enacted to prevent practices having an appreciable adverse effect on competition.
- ii. To promote and sustain competition in the market and to protect the interests of consumers.
- iii. To ensure freedom of trade.
- iv. With the enforcement of the Competition Act, 2002 the MRTP Act, 1969 shall stand repealed and the MRTP Commission shall be dissolved.
- v. The Competition Act, 2002 provides for the establishment of Competition Commission of India (CCI) and prescribes its duties, functions, and powers.

IV. The Competition Commission of India (CCI)

The Competition Commission of India (CCI), was established by the Central Government on 14th October 2003. The Commission is a body corporate having perpetual succession and common seal. CCI consists of a Chairperson and Six Members appointed by the Central Government. It is the duty of the Commission to eliminate practices having adverse effect on competition, promote and sustain competition, protect the interests of consumers and ensure freedom of trade in the markets of India. The Commission is also required to give opinion on competition issues on a reference received from a statutory authority established under any law and to undertake competition advocacy, create public awareness and impart training on competition issues.

The Competition commission has been establishment for the accomplishment of the following objectives:

- To prevent practices having adverse effect on competition.
- To promote and sustain competition in markets.
- To protect the interests of consumers and,
- To Ensure freedom of trade carried on by other participants in markets, in India

V. Role of CCI

The preamble to the competition act states "An Act to provide, keeping in view of the economic development of the country, for the establishment of a Commission to prevent practices having adverse effect on competition, to promote and sustain competition in markets, to protect the interests of consumers and to ensure freedom of trade carried on by other participants in markets, in India, and for matters connected therewith or incidental thereto".

To achieve its objectives, the Competition Commission of India endeavours to do the following:

- Make the markets work for the benefit and welfare of consumers.
- Ensure fair and healthy competition in economic activities in the country for faster and inclusive growth and development of economy.
- Implement competition policies with an aim to effectuate the most efficient utilisation of economic resources.
- Develop and nurture effective relations and interactions with sectoral regulators to ensure smooth alignment of sectoral regulatory laws in tandem with the competition law.
- Effectively carry out competition advocacy and spread the information on benefits of competition among all stakeholders to establish and nurture competition culture in Indian economy.

VI. Role of CCI As a Business Facilitator

Fair competition is key to a thriving business sector. CCI protects businesses from other businesses' unfair practices and penalises the erring entities too. It promotes competition by preventing abuse of dominance by a market player to the detriment of other competitors and the consumers. As such it ensures the co-existence of large and small enterprises.

5.2.4 Insurance Regulatory and Development Authority of India (IRDAI)

I. Introduction

Insurance Regulatory and Development Authority of India (IRDAI) is an autonomous apex statutory body which regulates and develops the insurance industry in India. It was constituted under Insurance Regulatory and Development Authority Act, 1999 and duly passed by the Parliament.

The IRDA Act, 1999 allows private players to enter the insurance sector in India besides a maximum foreign equity of 26 per cent in a private insurance company having operations in India. The Insurance Bill (Proposed by UPA government in July, 2013) but passed in July, 2014, raised the FDI limit in insurance sector to 49%. It serves as an Authority to protect the interests of holders of insurance policies, to regulate, promote and ensure orderly growth of the insurance industry and for matters connected therewith.

IRDAI role is to protect rights of policy holders and they provide registration certification to life insurance companies and responsible for renewal, modification, cancellation and suspension of this registered certificate.

II. Mission Statement of the Authority

- To protect the interests of and secure fair treatment to policyholders;
- To bring about speedy and orderly growth of the insurance industry (including annuity and superannuation payments), for the benefit of the common man, and to provide long term funds for accelerating growth of the economy;
- To set, promote, monitor and enforce high standards of integrity, financial soundness, fair dealing and competence of those it regulates;
- To ensure speedy settlement of genuine claims, to prevent insurance frauds and other malpractices and put in place effective grievance redressal machinery;
- To promote fairness, transparency and orderly conduct in financial markets dealing with insurance and build a reliable management information system to enforce high standards of financial soundness amongst market players;
- To take action where such standards are inadequate or ineffectively enforced;

- To bring about optimum amount of self-regulation in day-to-day working of the industry consistent with the requirements of prudential regulation.

III. Duties, Powers and Functions of IRDAI

Section 14 of IRDAI Act, 1999 lays down the duties, powers and functions of IRDAI.

Subject to the provisions of this Act and any other law for the time being in force, the Authority shall have the duty to regulate, promote and ensure orderly growth of the insurance business and re-insurance business. The powers and functions of the Authority shall include:

- issue to the applicant a certificate of registration, renew, modify, withdraw, suspend or cancel such registration;
- protection of the interests of the policy holders in matters concerning assigning of policy, nomination by policyholders, insurable interest, settlement of insurance claim, surrender value of policy and other terms and conditions of contracts of insurance;
- specifying requisite qualifications, code of conduct and practical training for intermediary or insurance intermediaries and agents
- specifying the code of conduct for surveyors and loss assessors;
- promoting efficiency in the conduct of insurance business;
- promoting and regulating professional organisations connected with the insurance and re-insurance business;
- levying fees and other charges for carrying out the purposes of this Act;
- calling for information from, undertaking inspection of, conducting enquiries and investigations including audit of the insurers, intermediaries, insurance intermediaries and other organisations connected with the insurance business;
- control and regulation of the rates, advantages, terms and conditions that may be offered by insurers in respect of general insurance business.
- specifying the form and manner in which books of account shall be maintained and statement of accounts shall be rendered by insurers and other insurance intermediaries;
- regulating investment of funds by insurance companies;
- regulating maintenance of margin of solvency;
- adjudication of disputes between insurers and intermediaries or insurance intermediaries;
- supervising the functioning of the Tariff Advisory Committee;
- specifying the percentage of premium income of the insurer to finance schemes for promoting and regulating professional organisations referred to in clause (f);
- specifying the percentage of life insurance business and general insurance business to be undertaken by the insurer in the rural or social sector; and
- exercising such other powers as may be prescribed.

IV. Role of IRDAI as Business Facilitator

IRDAI also acts as a business facilitator. Firstly, it takes steps to regulate and develop the insurance industry in the country. Secondly, it serves as an authority to protect the interest of the insurance policy holders in create confidence among them. Thirdly, IRDAI disseminates a lot of information for the benefit of policy holders and also for educating the general public about the advantages of getting insurance policies and keeping them alive.

5.3 FUNDING INSTITUTIONS (INDIAN DEVELOPMENT BANKS)

Development Banks are those financial institutions that provide funds and financial assistance to new and upcoming business enterprises. Development banks are distinguishable from commercial banks. Unlike commercial banks they do not accept deposits. They draw their resources from the government and other promoting agencies. As such they are referred to as “purveyors” of credit. While discussing the role of RBI as a business facilitator we mentioned that the instruments of SLR and CRR are the means through which the funds are usurped from the banking sector and these funds are placed with the development banks (See Know-how #1).

Know-how: SLR and CRR Mechanism

SLR: It represents the ratio of liquid assets of the banks to their deposit liabilities – the liquid assets include among other things, government securities whose issuer is the Reserve Bank of India. Clearly such a ratio is an indicator of banks’ liquidity and solvency i.e. their ability to meet their liabilities on demand. Reserve Bank of India is authorised to stipulate the statutory liquidity ratio and thus mop up funds from the banking sector. These funds may then be made available to the development banks for purveying credit to the businesses.

CRR: It is the ratio of cash to the total deposits that the banks are required to maintain on a daily basis. However Banks don’t hold these as cash with themselves, they deposit such cash (aka currency chests) with Reserve Bank of India which is considered as equivalent to holding cash with themselves. The amount raised by the RBI through prescription of this minimum ratio may also be utilised for channelization by development banks. As on 31-05-2017, Current Cash Reserve Ratio stood at 4% and Current Statutory Liquidity Ratio was 20.50%. Thus, RBI can usurp nearly a quarter of bank funds for purveying of credit in response to the developmental needs of the country.

In India, the genesis of development banking may be traced to the setting up of the Industrial Finance Corporation of India (IFCI) in 1948. The setting up of the Industrial Credit and Investment Corporation of India (ICICI) took place in 1955 and the Industries Development Bank of India (IDBI) in 1964. The latter two development banks have since converted into commercial banks. Thus, the IFCI is the lone surviving industrial development bank in India at present. The National Bank for Agricultural and Rural Development (NABARD) was set up in 1982. The Small Industries Development Bank of India (SIDBI) spun off from the IDBI in 1990.

5.3.1 Industrial Finance Corporation of India (IFCI)

The Industrial Finance Corporation of India (IFCI) was established in 1948 under a special Act. The Industrial Development Bank of India, Scheduled banks, insurance companies, investment trusts and co-operative banks are its shareholders. The corporation is authorised to issue bonds and debentures in the open market, to borrow foreign currency from the World Bank and other international organisations, to accept deposits from the public and also borrow from the Reserve Bank. With effect from July 1, 1993 IFCI has been converted into a public limited company and is now known as Industrial Finance Corporation of India Ltd.

I. Functions of the IFCI

The corporation performs the following functions:

- It gives loans and advances to industrial concerns and subscribes to the debentures floated by them.
- It guarantees loans raised by the industrial concerns

- It underwrites shares and debentures of the industrial concerns.
- It guarantees deferred payments in respect of import of machinery, foreign currency loans raised from foreign institutions and rupee loans raised from scheduled banks or state cooperative banks by Industrial concerns.

The IFCI has also set up Merchant Banking and Allied Services Department (MBAD). This department takes up the assignments for capital restructuring, merger and amalgamation, loan syndication with other financial institutions and trusteeship assignments.

In order to sub serve its main function of assisting industrialisation of the country, IFCI has helped in the promotion and establishment of the following institutions - Investment Information and Credit Rating Agency of India Ltd., IFCI Venture Capital Funds Ltd., Over the Counter Exchange of India Ltd., National Stock Exchange of India Ltd. and Stock Holding Corporation of India Ltd. etc.

IFCI has also promoted three subsidiaries, viz; IFCI Financial Services Ltd., IFCI Investors Services Ltd. and I-Fin. It also plans to diversify into insurance, asset management and stock broking.

While granting loans to an industrial concern applying for financial aid, the corporation looks into the following factors - the importance of the industry for the national economy, the cost of the project for which aid is required, the competence of the management and the quality of the product etc. Only when it is satisfied on the above factors, it grants loan. It has the right to appoint two directors to the board of management of the borrowing unit to ensure interests of the corporation. The borrowing concern is required to submit periodic report to the corporation. The corporation has the right to take over the management of the defaulting concern if there is a continuous default in the payment of interest and of the principal advanced to the concern.

Since its inception as a Public Financial Institution, IFCI has made significant contributions to the modernization of Indian industry, export promotion, import substitution, pollution control, energy conservation and generation through commercially viable and market-friendly initiatives. Some sectors that have directly benefited from IFCI include:

Some sectors that have directly benefited from IFCI include:

- Agro-based industry (textiles, paper, sugar)
- Service industry (hotels, hospitals)
- Basic industry (iron & steel, fertilizers, basic chemicals, cement)
- Capital & intermediate goods industry (electronics, synthetic fibres, synthetic plastics, miscellaneous chemicals) and Infrastructure (power generation, telecom services)

II. IFCI's economic contribution can be measured from the following:

1. IFCI has played a key role in the development of cooperatives in the sugar and textile sectors, besides acting as a nodal agency in both sectors. 371 cooperative societies in these sectors have been assisted by IFCI.
2. IFCI has promoted Technical Consultancy Organizations (TCOs), primarily in less developed states to provide necessary services to the promoters of small and medium-sized industries in collaboration with other banks and institutions.
3. IFCI has also provided assistance to self-employed youth and women entrepreneurs under its Benevolent Reserve Fund (BRF) and the Interest Differential Fund (IDF).
4. IFCI has founded and developed prominent institutions like:

- Management Development Institute (MDI) for management training and development
 - ICRA for credit assessment rating.
 - Tourism Finance Corporation of India (TFCI) for promotion of the hotel and tourism industry.
 - Institute of Leadership Development (ILD) for rehabilitation and training of displaced and retrenched labour force.
 - Rashtriya Gramin Vikas Nidhi (RGVN) for promoting, supporting and developing voluntary agencies engaged in uplifting rural and urban poor in east and northeast India.
5. IFCI, along with other institutions, has also promoted:
- Stock Holding Corporation of India Ltd. (SHCIL)
 - Discount and Finance House of India Ltd. (DFHI)
 - National Stock Exchange (NSE)
 - OTCEI
 - Securities Trading Corporation of India (STCI)
 - LIC Housing Finance Ltd.
 - GIC Housing Finance Ltd.
 - Biotech Consortium India Ltd. (BCIL)
6. IFCI has also set up Chairs in reputed educational/management institutions and universities.
7. A major contribution of IFCI has been in the early assistance provided by it to some of today's leading Indian entrepreneurs who may not have been able to start their enterprises or expand without the initial support from IFCI.

The Government of India converted its OCDs worth Rs. 923 crores into equity in December 2012 and further acquired preference shares of Rs. 60 crores from PSU Banks in April 2015. IFCI has become a Government of India Undertaking with effect from 7th April 2015.

The Govt. of India has placed a Venture Capital Fund of Rs. 200 crore for Scheduled Castes (SC) with IFCI with an aim to promote entrepreneurship among the Scheduled Castes (SC) and to provide concessional finance. IFCI has also committed a contribution of Rs.50 crore as lead investor and Sponsor of the Fund. IFCI Venture Capital Funds Ltd., a subsidiary of IFCI Ltd., is the Investment Manager of the Fund. The Fund has been operationalized during FY 2014-15 and IVCF is continuously making efforts for meeting the stated objective of the scheme.

Further, Government of India has recently designated IFCI as a nodal agency for "Scheme of Credit Enhancement Guarantee for Scheduled Caste (SC) Entrepreneurs" in March, 2015 with an objective to encourage entrepreneurship in lower strata of the societies. Under the Scheme IFCI would provide guarantee to banks against loans to young and start-up entrepreneurs belonging to scheduled castes.

5.3.2 Small Industries Development Bank of India (SIDBI)

The Small Industries Development Bank of India (SIDBI) was established under a special act of the Parliament in 1990 as a wholly owned subsidiary of IDBI. It is now the premier financial institution for promoting, financing and developing small scale industries in the country. It also coordinates the functioning of other institutions involved in similar activities. It has taken over the responsibility of administering Small Industries Development Fund and National Equity Fund from IDBI.

I. Functions of SIDBI

The important functions of SIDBI are as follows:-

- It refinances loans and advances given by the primary lending institutions to small units for domestic sale and exports.
- It discounts and rediscounts bills resulting from sale of machinery to or manufactured by industrial units in the small scale sector.
- It provides leasing and factoring services to the small units.
- It extends seed, capital and soft loan assistance to special schemes such as National Equity Fund, Mahila Udyam Nidhi etc.
- It provides financial help to National Small Industries Corporation for providing leasing, hire-purchase and marketing support to small units.
- It also financially supports State Small Industries Development Corporations in its efforts to provide scarce raw materials and marketing facilities to small units.

Small Industries Development Bank of India (SIDBI), set up on April 2, 1990 under small industries development bank of India act, is the Principal Financial Institution for the Promotion, Financing and Development of the Micro, Small and Medium Enterprise (MSME) sector and for Co-ordination of the functions of the institutions engaged in similar activities.

The business sphere of SIDBI consists of Micro, Small and Medium Enterprises (MSMEs), which contribute significantly to the national economy in terms of production, employment and exports. MSME sector is an important pillar of Indian economy as it contributes greatly to the growth of Indian economy with a vast network, creating employment, manufacturing products directly or indirectly. In addition, SIDBI's assistance also flows to the service sector including transport, health care, tourism sectors etc.

In its endeavour towards holistic development of the MSME sector, SIDBI adopts a 'Credit Plus' approach wherein, besides credit, the Bank also provides grant support for the Promotion and Development (P&D) of the sector to make it strong, vibrant and competitive. The P&D activities of the bank include Micro Enterprise Promotion, Entrepreneurship Development, Cluster Development, Capacity Building of the MSME Sector, promoting Responsible Finance among Micro Finance Institutions, Sustainable Finance to MSMEs including Energy Efficiency, Environment Protection, etc.

SIDBI also functions as a Nodal/ Implementing Agency to various ministries of Government of India viz., Ministry of MSME, Ministry of Textiles, Ministry of Commerce and Industry, Ministry of Food Processing and Industry, etc.

SIDBI has taken the initiative to promote several institutions viz., Credit Guarantee Fund Trust for Micro and Small Enterprises, SIDBI Venture Capital, SME Rating Agency of India Ltd and India SME Technology Services Ltd., for the benefit of the MSME sector.

As an apex institution, SIDBI makes use of the network of the banks and state level financial institutions, which have retail outlets. SIDBI supplements the efforts of existing institutions through its direct assistance schemes to reach financial assistance to the ultimate borrowers in the small scale sector. Refinancing, bills rediscounting, lines of credit and resource support mechanisms have evolved over the period of time to route SIDBI's assistance through the network of other retail institutions in the financial system.

Improved levels of co-ordination for development of the small scale sector is also achieved through a system of dialogue and obtaining feedback from the representatives of institutions of small scale industries who are on the SIDBI's National Advisory Committee and Regional Advisory Committees.

SIDBI has entered into Memoranda of Understanding with many banks, governmental agencies, international agencies, research & development institutions and industry associations to facilitate a co-ordinated approach in dealing with the issues for development of small scale industries.

5.3.3 Export and Import Bank of India (EXIM) Bank

The Export and Import Bank of India (EXIM) bank was set up in 1982 to act as the principal financial institution in the field of international trade of India. For this, it took over the operations of the international finance wing of the IDBI. The EXIM bank provides financial assistance to exporters and importers and also coordinates the working of other institutions engaged in financing of exports and imports of goods and services. It also provides refinancing facilities to the primary lending institutions; banks and financial institutions engaged in financing exports and imports.

I. Functions of EXIM Bank

The EXIM bank performs the following functions:

- It finances exports and imports of goods and services of India
- It finances exports and imports of goods and services of third world countries.
- It finances exports and imports of machinery on lease basis.
- It finances joint ventures abroad.
- It gives loan to Indian parties to enable them to contribute to the share capital of joint venture abroad.
- It also provides technical, administrative, financial assistance to parties engaged in exports and imports.
- It underwrites shares, stocks, bonds or debentures of companies engaged in exports or imports.

Besides the above, it provides counselling services to companies engaged in exports and imports. It acts as an apex banking institution in the field of foreign trades.

5.3.4 National Bank for Agriculture and Rural Development (NABARD)

National Bank for Agriculture and Rural Development (NABARD) is an apex development bank in India, headquartered at Mumbai with branches all over India. The Bank has been entrusted with "matters concerning policy, planning and operations in the field of credit for agriculture and other economic activities in rural areas in India". NABARD is active in developing financial inclusion policy and is a member of the Alliance for Financial inclusion.

I. Role of NABARD

NABARD has been instrumental in grounding rural, social innovations and social enterprises in the rural hinterlands. It has in the process partnered with about 4000 organisations in grounding many of the interventions be it, SHG-Bank Linkage programme, tree-based tribal communities' livelihoods initiative, watershed approach in soil and water conservation, increasing crop productivity initiatives through lead crop initiative or dissemination of information flow to agrarian communities through Farmer clubs. Despite all this, it pays huge taxes too, to the exchequer – figuring in the top 50 tax payers consistently. NABARD virtually ploughs back all the profits for development spending, in their unending search for solutions and answers. Thus the organisation had developed a huge amount of trust capital in its 3 decades of work with rural communities.

1. NABARD is the most important institution in the country which looks after the development of the cottage industry, small industry and village industry, and other rural industries.
2. NABARD also reaches out to allied economies and supports and promotes integrated development.

3. NABARD discharge its duty by undertaking the following roles:
 - i. Serves as an apex financing agency for the institutions providing investment and production credit for promoting the various developmental activities in rural areas
 - ii. Takes measures towards institution building for improving absorptive capacity of the credit delivery system, including monitoring, formulation of rehabilitation schemes, restructuring of credit institutions, training of personnel, etc.
 - iii. Co-ordinates the rural financing activities of all institutions engaged in developmental work at the field level and maintains liaison with Government of India, state governments, Reserve Bank of India (RBI) and other national level institutions concerned with policy formulation
 - iv. Undertakes monitoring and evaluation of projects refinanced by it.
 - v. NABARD refinances the financial institutions which finances the rural sector.
 - vi. NABARD partakes in development of institutions which help the rural economy.
 - vii. NABARD also keeps a check on its client institutes.
 - viii. It regulates the institutions which provide financial help to the rural economy.
 - ix. It provides training facilities to the institutions working in the field of rural upliftment.
 - x. It regulates the cooperative banks and the RRB's, and manages talent acquisition through IBPS CWE.

NABARD's refinance is available to state co-operative agriculture and rural development banks (SCARDBs), state co-operative banks (SCBs), regional rural banks (RRBs), commercial banks (CBs) and other financial institutions approved by RBI. While the ultimate beneficiaries of investment credit can be individuals, partnership concerns, companies, State-owned corporations or co-operative societies, production credit is generally given to individuals. NABARD has its head office at Mumbai, India.

NABARD is also known for its 'SHG Bank Linkage Programme' which encourages India's banks to lend to self-help groups (SHGs). Largely because SHGs are composed mainly of poor women, this has evolved into an important Indian tool for microfinance.

NABARD also has a portfolio of Natural Resource Management Programmes involving diverse fields like Watershed Development, Tribal Development and Farm Innovation through dedicated funds set up for the purpose.

SUMMARY

The financial system in India is regulated by independent regulators in the field of banking, insurance, capital market, commodities market, and pension funds. Government of India plays a significant role in controlling the financial system in India by influencing these regulators. Indian regulatory bodies like SEBI, RBI, IRDA, CCI and the Indian development banks like IFCI, SIDBI, EXIM Bank, NABARD are the key organizations that facilitate businesses in India.

- SEBI is an authority to regulate and develop the Indian capital market and protect the interest of investors in the capital market. Controller of Capital Issues has been repealed by the SEBI, an authority under Capital Issue (Control) Act, 1947.
- The Reserve Bank of India (RBI) is the Central Bank of our country. It occupies a pivotal position in the Indian economy. The RBI, being the Central Bank of India performs all the central banking functions.
- Insurance Regulatory and Development Authority of India (IRDAI) is an autonomous apex statutory body which regulates and develops the insurance industry in India. It was constituted by a Parliament

of India Act called Insurance Regulatory and Development Authority Act, 1999 and duly passed by the Government of India.

- Competition Commission of India is responsible for enforcing The Competition Act, 2002 throughout India and to prevent activities that have an appreciable adverse effect on competition in India.

Development banks like IFCI, SIDBI, and EXIM etc. were set up to meet long term and short term capital requirements of the industry.

- The Industrial Finance Corporation of India (IFCI) was established in 1948 under a special Act and is authorised to issue bonds and debentures in the open market, to borrow foreign currency from the World Bank and other international organisations, to accept deposits from the public and also borrow from the Reserve Bank.
- The Small Industries Development Bank of India (SIDBI) was established under a special act of the Parliament in 1990 as a wholly owned subsidiary of IDBI and it is now the premier financial institution for promoting, financing and developing small scale industries in the country.
- The Export and Import Bank of India (EXIM) bank as set up in 1982 to act as the principal financial institution in the field of international trade of India. The EXIM bank provides financial assistance to exporters and importers and also coordinates the working of other institutions engaged in financing of exports and imports of goods and services.

TEST YOUR KNOWLEDGE

Multiple Choice Questions

1. Who was the regulatory body for controlling financial affairs in India before SEBI?
 - a. Controller of Capital Issues
 - b. Reserve Bank of India
 - c. Insurance Regulatory and Development Authority of India
 - d. Government of India
